STRATEGY HIGHLIGHTS

The *Ultra Short Term Bond* strategy seeks to achieve above-benchmark returns consistently throughout market cycles with low volatility relative to the *ICE BofA Blended 0-3 Year Treasury Index*. Driven by a proprietary model, the strategy focuses on active duration management, sector selection and term structure positioning.

- Invests primarily in U.S. Treasuries, federal agencies and investment grade corporate bonds rated "A" and above
- Typically maintains at least 10% of the portfolio in U.S. Treasuries and maximum 50% in corporates.
- Duration closely tracks index duration

KEY ELEMENTS OF OUR APPROACH

- Constrain portfolio duration relative to the benchmark to maintain the desired exposure to market risk
- Strategically allocate assets to market sectors and rotate sectors as values change
- Position securities along the yield curve to capture additional value as yield curves shift
- Select individual securities that we believe offer the greatest potential to maximize yield

STRATEGY PROFILE

- Inception date: 11/30/88
- Approx. 50-60 Security Holdings
- High Grade Minimum Rating "A"
- 5-15% Annual Turnover

The information herein is provided for informational purposes only. No investment decision should be made based solely on the information provided herein. All investment strategies have the potential for profit or loss. The strategy referenced may not be suitable for all investors. There is no guarantee that investment in this strategy will result in characteristics similar to those that appear in this presentation due to changes in economic conditions and other market factors. Fixed income investments are subject to interest, credit and market risk. Interest rate risk: the value of fixed income investments will decline as interest rates rise. Credit risk: the possibility that the borrower may not be able to repay interest and principal. Low rated bonds generally have to pay higher interest rates to attract investors willing to take on greater risk. Market risk: the bond market in general could decline due to economic conditions, especially during periods of rising interest rates.

Minimum investment for an institutional account is $2 million. Retail accounts available with a reduced minimum investment size through Separately Managed Account platforms. Minimum investment varies depending on the managed account sponsor. Please call Chandler to verify amount. Fixed income investments are subject to interest, credit, and market risk. Interest rate risk: the value of fixed income investments will decline as interest rates rise. Credit risk: the possibility that the borrower may not be able to repay interest and principal. Low rated bonds generally have to pay higher interest rates to attract investors willing to take on greater risk. Market risk: the bond market in general could decline due to economic conditions, especially during periods of rising interest rates.

The ICE BofA Blended 0-3 Year US Treasury Index is a static, internally maintained benchmark comprised of US dollar denominated sovereign debt publicly issued by the US government in its domestic market. Effective 1/1/2001, it consists of the following indices: (30%) ICE BofA US 3-Month Treasury Bill Index, (30%) ICE BofA US 6-Month Treasury Bill Index, (40%) ICE BofA 1-3 Year US Treasury Index. Qualifying securities will include 3 and 6-month Treasury Bills and US Treasury securities that must have at least one year remaining term to final maturity and less than three years remaining term to final maturity, a fixed coupon schedule, and a minimum amount outstanding of $1 billion. Qualifying securities must have at least 18 months to final maturity at the time of issuance. *Prior to 1/1/2001 it consisted of (100%) ICE BofA US 1-Year Treasury Bill Index, G0O3.
